- Updates & Upcoming Go-Lives!
 - Community Support Services (CSS) Project
 - Total Joint Replacement (TJR) Project
- Happy Holidays from the RM&R Program Team

2015 Accomplishments

The RM&R Program has had a very successful year! The following lists some of the accomplishments from 2015, which includes expansion to new clinical areas, standardizing existing pathways and further enhancing the operational support, maintenance and reporting of RM&R.

- Expanding the use of RM&R at **54** CAMH units to include Rehab/CCC and Community pathways
- Implementation of Provincial Referral Standards (**PRS**) in Short-Stay, Convalescent and Rehab/CCC pathways
- Implementation of **intra-facility rehab beds** at both Sunnybrook Health Sciences Centre & Toronto East General Hospital
- Over **240** environment change requests completed for sites
- Refining ORBIT to make the tool more robust including the addition of **ABI referral** data
- Development of new quarterly TC LHIN Long Term Care (LTC) report to **support capacity planning and assessment** of LTC wait times
- The RM&R Team took home a **Canadian Health Informatics Award** in the “Project Team Implementation” category for the Implementation of Inpatient Palliative Care!

These successes would not have been possible without the commitment of RM&R participating sites. Thank you for your continued support! We look forward to more success in the new year.

Project Updates & Upcoming Go-Lives

Total Joint Replacement (TJR) Project

The TJR project team has scheduled on-site and webinar training sessions for participating organizations of the TJR project in preparation for go-live, planned for **January 28, 2016**. In addition, onboarding of new users is also underway. Post go-live, the project team will provide a two week support period with each site as part of the transition to operations.

Community Support Services (CSS) Project

The CSS project is currently underway with technical development of the CSS forms in preparation for testing. Steering Committee meetings are also taking place in order to determine the future state vision and overall process of CSS referrals in RM&R. Go-live is targeted for **February 2016**, which includes streamlining of CSS referral forms and onboarding additional users to further support referrals to the CNAP Hub and CSS agencies.

Happy Holidays from the RM&R Program

Thank you to all RM&R participating organizations for your support this year!

Wishing all of you a happy, healthy and peaceful holiday season and a prosperous and successful 2016!
