

What is community services referral form?

What is a community services referral Form

A community services referral form is used by sending service providers to send community services referrals to receiving community service providers. Listed below are all the tabs which need to be completed when sending a Community Services referral form. Please view '**How do I complete a referral?**' for more details.

Client Details (1)

A summary of key information about the referral form, such as Patient name, MRN and responsible person(s) for the referral. This is a standard tab across all referral care types.

Demographics (2)

Relevant information identifying the patient. This is a standard tab across all referral care types.

Community Form (3)

Includes information required by the Community Services hub to determine the appropriate community services for the patient. Examples of fields include: What is the client's care needs, Consent and reason for the referral.

Send/Manage Referrals (4)

Includes current referrals associated with the patient and functionalities to send the referral. Please view '**How do I send a Community Services referral?**' guide for more details on sending a referral.

Access to different care type referral forms is set at an organization and user level. Please contact your **Local Registration Authority (LRA)** for details and to request access. If you are unsure of your LRA, please contact the **RM&R program** at rmm_program@uhn.ca
