# Client Details (1)

A summary of key information about the referral form, such as patient name, MRN and responsible person(s) for the referral. This is a standard tab across all referral care types.

#### **Demographics (2)**

Relevant information identifying the patient. This is a standard tab across all referral care types.

## **Referral Information (3)**

Includes a summary of the patient's surgery details, diagnoses and surgeon information.

This tab also indicates whether the referral is being completed pre- or post-operatively; in general, the pre-operative fields on the tab (such as type of surgery, date, anticipated date of discharge), are completed before patient has had TJR surgery, while post-operative fields are triggered categories (such as treatment restrictions, surgeon's agreement for referral) that are to be completed after surgery has taken place.

## Send/Manage Referrals (4)

The **Send/Manage Referrals** tab includes current referrals associated with the patient and functionalities to send the referral. Please view '**How do I send a referral [TJR]?**' guide for more details.

Access to different care type referral forms is set at an organization and user level. Please contact your **Local Registration Authority (LRA)** for details and to request access. If you are unsure of your LRA, please contact the **RM&R program** at **rmr\_program@uhn.ca**
