

What is a long term ventilation referral form?

What is the Long Term Ventilation care type

The Long Term Ventilation care type is for patients who are invasively ventilated with a tracheostomy in place for at least 14 days and medically stable for the past 7 days. Please view ['How do I complete a referral?'](#) for more details on completing a referral.

Client Details (1)

Includes a summary of key information about the referral form, such as Patient name, MRN and responsible person (s) for the referral. This is a standard tab across all referral care types.

Demographics (2)

Includes relevant information identifying the patient. This is a standard tab across all referral care types.

Referral Information (3)

Contains all necessary questions in relation to the patient referral including patient's current status.

Uploaded Files (4)

Any supporting documentation for the referral can be attached here.

Send/Manage Referrals (5)

Includes current referrals associated with the patient and functionalities to send the referral.
